

Please DO NOT eliminate the 5WPM code requirement. CW is still an integral part of the Radio Amateur's skill set. The requirement for Morse Code as well as the technical standards for the tests are what contribute to the high quality of the average operator involved in Amateur Radio. Without CW, it is just CB. An alternative might be to eliminate CW, but stop publishing the question pool. Just a few thoughts from an operator wishing to maintain the high standard of quality that has come to be expected from U.S. Radio Amateurs.
